PESTICIDE APPLICATIONS

Ref. No.	Treated Area		Pesticide Information			Application				Restricted Entry Interval (Hours)	Optional Information	
						Start		End			Notification	
	Location/Description	Crop or Site	Complete Name	EPA Reg. No.	Active Ingredient	Date	Time	Date	Time		Oral	Posting

- The pesticide application and hazard information for each pesticide product applied must be displayed no later than 24 hours after the end of the application of the pesticide.
- The pesticide application and hazard information must be displayed continuously from the beginning of the display period until at least 30 days after the end of the last applicable restricted-entry interval, or until workers or handlers are no longer on the establishment, whichever is earlier. **HOWEVER**: Workers cannot enter any area where a pesticide has been applied until (1) the applicable pesticide application and hazard information for each pesticide product applied to that area is displayed and (2) after the restricted-entry interval has expired and all treated area warning signs have been removed or covered.
- Post information at a place where workers or handlers are likely to pass by or congregate and where it can be readily seen and read. Information must remain legible.
- Workers and handlers must be allowed access to the location of the information at all times during normal work hours.
- The pesticide application and hazard information must be retained for two years after the date of expiration of the restricted-entry interval for the pesticide applied.
