

INFORMATION EXCHANGE INVOLVING GROWER APPLICATIONS

Whenever handlers employed by a commercial pesticide handling establishment (custom or for hire applicators) will be on an agricultural establishment, the grower must provide the handler employer with information about, or is aware of, the specific location and description of any treated areas where a restricted-entry interval is in effect that the handler may be in (or may walk within 1/4 mile of), and any restrictions on entering those areas.

Area Under a REI or ERP: Location & Description ¹	- OPTIONAL -		Restrictions on Entering	
	Product Applied & EPA Reg. No.	Entry Restricted Until: Month / Day / Time	PPE Required for Handlers	Early-Entry PPE Required for Workers

¹ REI means Restricted Entry Interval. ERP, which is specific to soil fumigants, means Entry Restricted Period.
