For a Workshop and Planning Session on

No-till Organic Vegetable Production in Western Washington

This two day event will bring together interested researchers, farmers, and extension professionals to learn about no-till farming practices in organic vegetable production and to help plan a research and extension project.

On the first day, no-till experts will be presenting and attendees will take a field trip to the rolling/crimping trial on pumpkins at 21 Acres in Woodinville. This session will be open to anyone interested in no- or low-till farming.

Day one presenters:

Paul Hepperly, Rodale Institute

Carmen Fernholz, A-Frame Farm, Minnesota

Ronald Morse, Virginia Tech

John Luna, Oregon State University

Day two will consist of planning for a research and extension project to further investigate no- or low-till methods for organic vegetable production in Western Washington.

EVENT INFORMATION:

Day One – Workshop and Farm Visit:

Wednesday, October 28 • 8:00 AM – 5:00 PM (Approx. times)

Day Two – Project Planning Session:

Thursday, October 29 • 9:00 AM – 3:00 PM (Approx. times)

Tentative Location: Everett and Woodinville, WA

There is no cost for this event. Meals, lodging, and travel costs will be covered. RSVP required.
