“Green Team” at Congregational Church Project

Issue
The Congregational Church parishioners desire to reduce their carbon footprint.

Inputs/Outputs
Two Carbon Masters, who are members of the congregation, help guide the church toward the most effective ways to reduce their footprint.

Methods:
- Organized a “climate change conversation” at the Earth Day service.
- Invited a guest speaker to speak about proactive community activities
- Member sewed reusable bags for a church fundraiser.
- Reorganized and properly signed their waste system, and trained parishioners on proper disposal.

Impacts:
- Reduced the amount of paper in the weekly church program, properly recycled waste.
- Raise awareness of issues.
- Energy saving.
