Information: whatcom.wsu.edu

Landscapes are considered sustainable if they reduce water demand, filter and reduce storm water run off, provide wildlife habitat, reduce energy consumption, improve air quality, improve human health and increase outdoor recreation. www.sustainablesites.org

Water Wise – Healthy Soil - Sustainable Design – Pick Great Plants

GARDENING GREEN provides practical information and simple yet powerful actions to protect the environment and human health. This is a relaxed, fun class that incorporates presentations, demonstrations, hands-on experiences, a native plant walk, and tours of sustainable landscapes. Includes an on-site consultation and a class manual.

Maintenance Strategies – Rainwater Harvesting – Wildlife Habitat

Participants are asked to 'pay' for this free class with outreach to friends and neighbors about sustainable landscaping for environmental and human health.
